An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jennifer Woodside on 2/9/07.

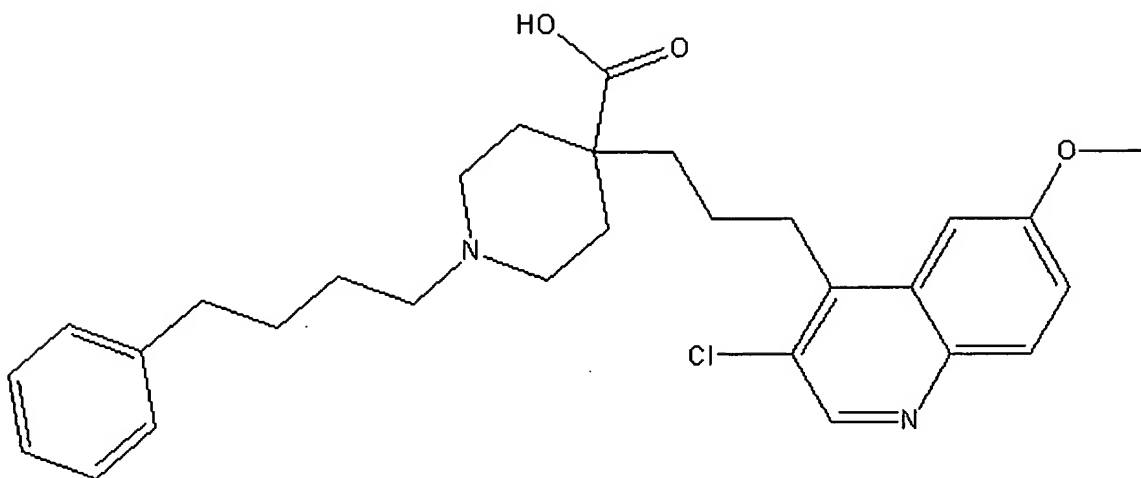

A. Claim 13 is cancelled without prejudice to the applicant filing a divisional application on this claim.

Reasons For Allowance

The closest prior art reference is Bacque et. al. ^{French Patent 2816618} (Cited by applicants). The difference between the Bacque compound and the instantly claimed compound is the point of attachment of R2 and the quinoline-Y-(CH₂)_m- moiety on the piperidiny ring. In the instant compound, the R2 group which can be carboxyl is attached to the piperidine ring at the 3 position as is the quinoline-Y-(CH₂)_m- moiety. In the Bacque compound, the R2 group which is carboxyl is attached to the piperidine ring at the 4 position as is

the quinoline-Y-(CH₂)_m- moiety. At page 28, lines 11-12, see compound,

4-[3-(3-chloro-6-methoxyquinolin-4-yl)propyl]-1-[4-phenylbutyl]piperidine-4-carboxylic acid

The prior art reference does not teach nor suggest to one of ordinary skill in the art how to modify the prior art compound to derive the instant compound. There is no motivation to make the positional isomer of the Bacque compound, where the isomerism occurs in two places on the piperidine ring. Therefore, the instant claims are allowable therefrom.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
